Nix solutions for your paint brand.

nix[™]
Color Sensor

Nix at a glance

In 2013 we recognized a problem with the current color sensors in the market; they were bulky, delicate, and expensive. Our mission was to change that. We created a technology that allows our customers to instantly find the closest paint match to your scanned object, and it fits right in your pocket.

Our patented system of hardware and software is already being used by tens of thousands of paint contractors and is currently available in over 50 countries.

Our talented team develops custom end-to-end workflow solutions that will generate revenue and sell more paint.

At Nix, we can do anything.

NM AUTOMATION & CONTROL PVT. LTD.

Nix guiding principles.

These have continued to be our guiding principles:

Accessible

No longer do accurate color sensors need to cost thousands of dollars. We've brought the cost down without sacrificing accuracy, making them accessible to a broader audience.

Portable

Our sensors aren't confined to the lab or countertop. Expertly designed to fit in your pocket, you can take them anywhere.

Durable

Our devices are built for real life. Accidents happen, and our devices are made to handle the bumps and drops along the way.

NM AUTOMATION & CONTROL PVT. LTD.

Nix sensors.

Nix Mini 2 Color Sensor

Retail: \$99 USD

Scan any surface and find the closest paint match in the Nix Paints app. Find suggested color harmonies and save your matches into projects. Perfect for homeowners, professional painters, and interior designers.

Nix Pro 2 Color Sensor

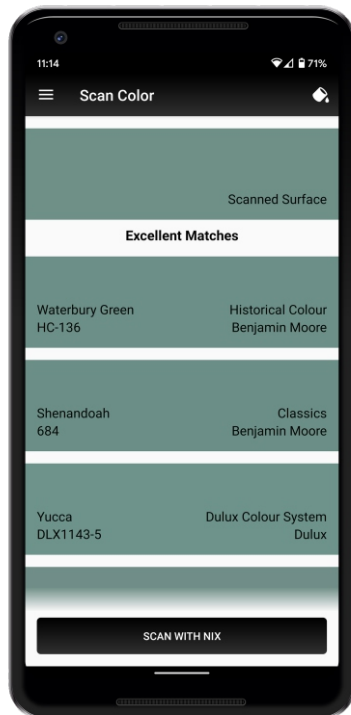

Retail: \$349 USD

Conduct A/B color comparisons, import custom color libraries, and export data easily in the Nix Pro app. Perfect for color professionals and anyone looking for a bit more technical color data. (The Nix Pro 2 also works with the Nix Paints app).

Nix Paints app.

Scan with Nix and view paint matches on your phone

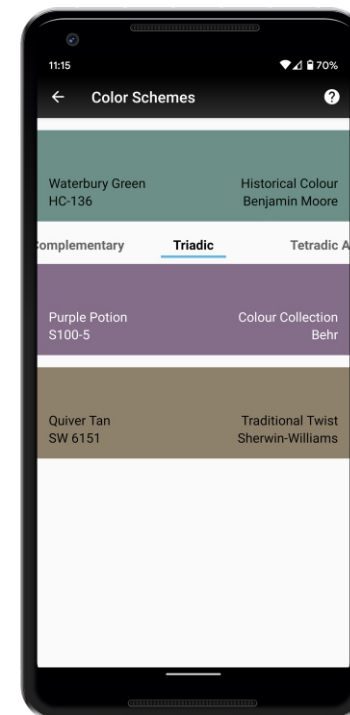

Options to save your swatches into folders or share the details with friends, family, clients, or coworkers

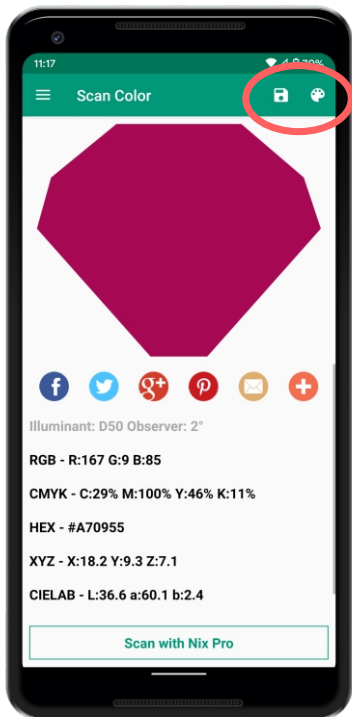

The app links to your brand's website to purchase paint

View suggested color palettes that are monochromatic, complementary, triadic, and more

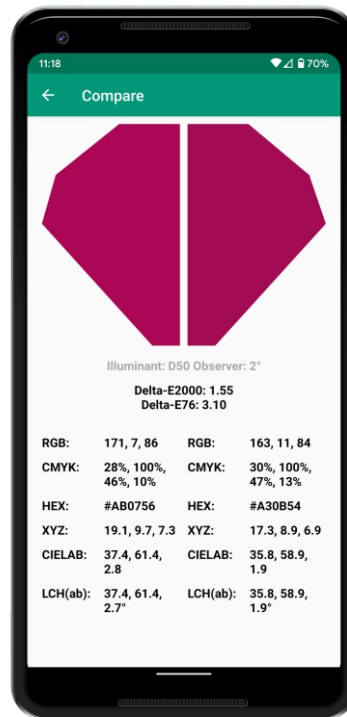

Nix Pro app.

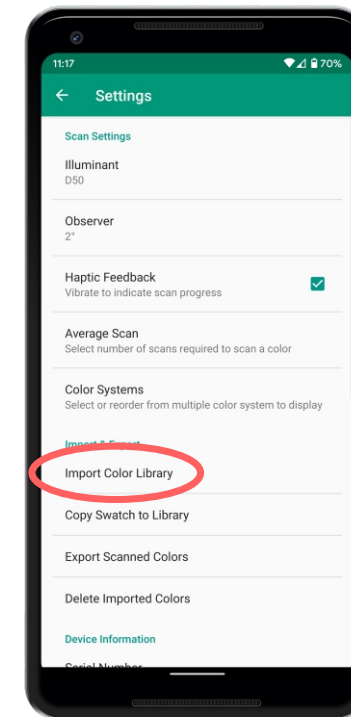

Options to save your swatches into folders or match to the nearest paint color

Scan with Nix and get digital color values on your phone

Compare two colors and get their Delta E (compare a painted wall to the swatch to confirm paint matches)

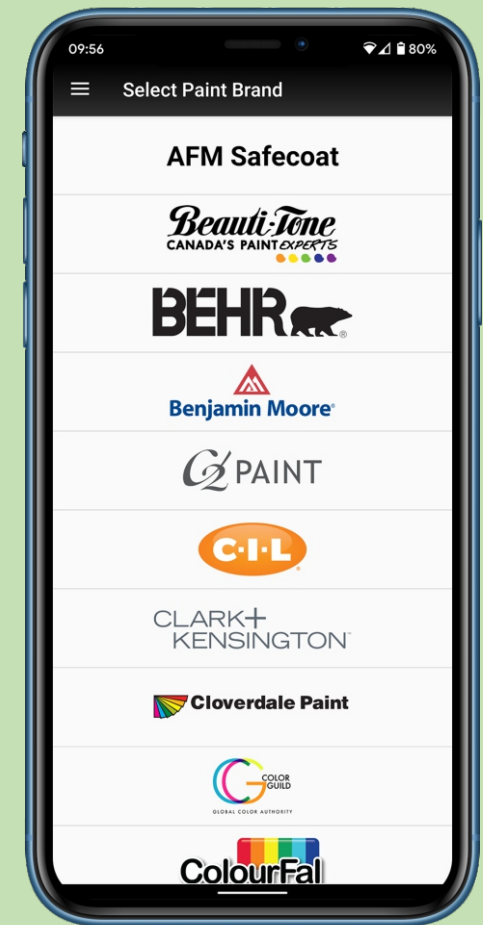

Allows users to import their own library to match their samples to

Nix color database.

With over 200,000 paint colors in over 100 brands, we're sure to find your match. If you don't see your brand listed in our app, contact us and our dedicated team will add it in.

Nix customers.

Interior designers + home décor professionals.

Finding paint matches for customers has never been easier. Fan decks are heavy and need to be replaced often. With the Nix Paints app you can match to any brand you desire right from your phone.

DIYers + homeowners.

Get inspired by all the color around you. Become confident in your choices and find suggested color palettes that compliment each other.

Pro painters + contractors.

Don't cut out wall samples to get matched. Use the Nix Mini 2 to simply scan and find your paint match.

Retail stores.

Turn your paint store associates into color experts, supporting their confidence in color matching.

Architects.

Build out your next project right in the app. The Nix Pro 2 is capable of matching to metals, vinyls, and more.

NM AUTOMATION & CONTROL PVT. LTD.

Nix success in retail: in-store use.

Equip your staff with a Nix Mini Color Sensor so they can help customers find matches on the fly. Reduce time from having to browse hundreds of swatches. With the simple click of a button, you'll instantly get the closest match.

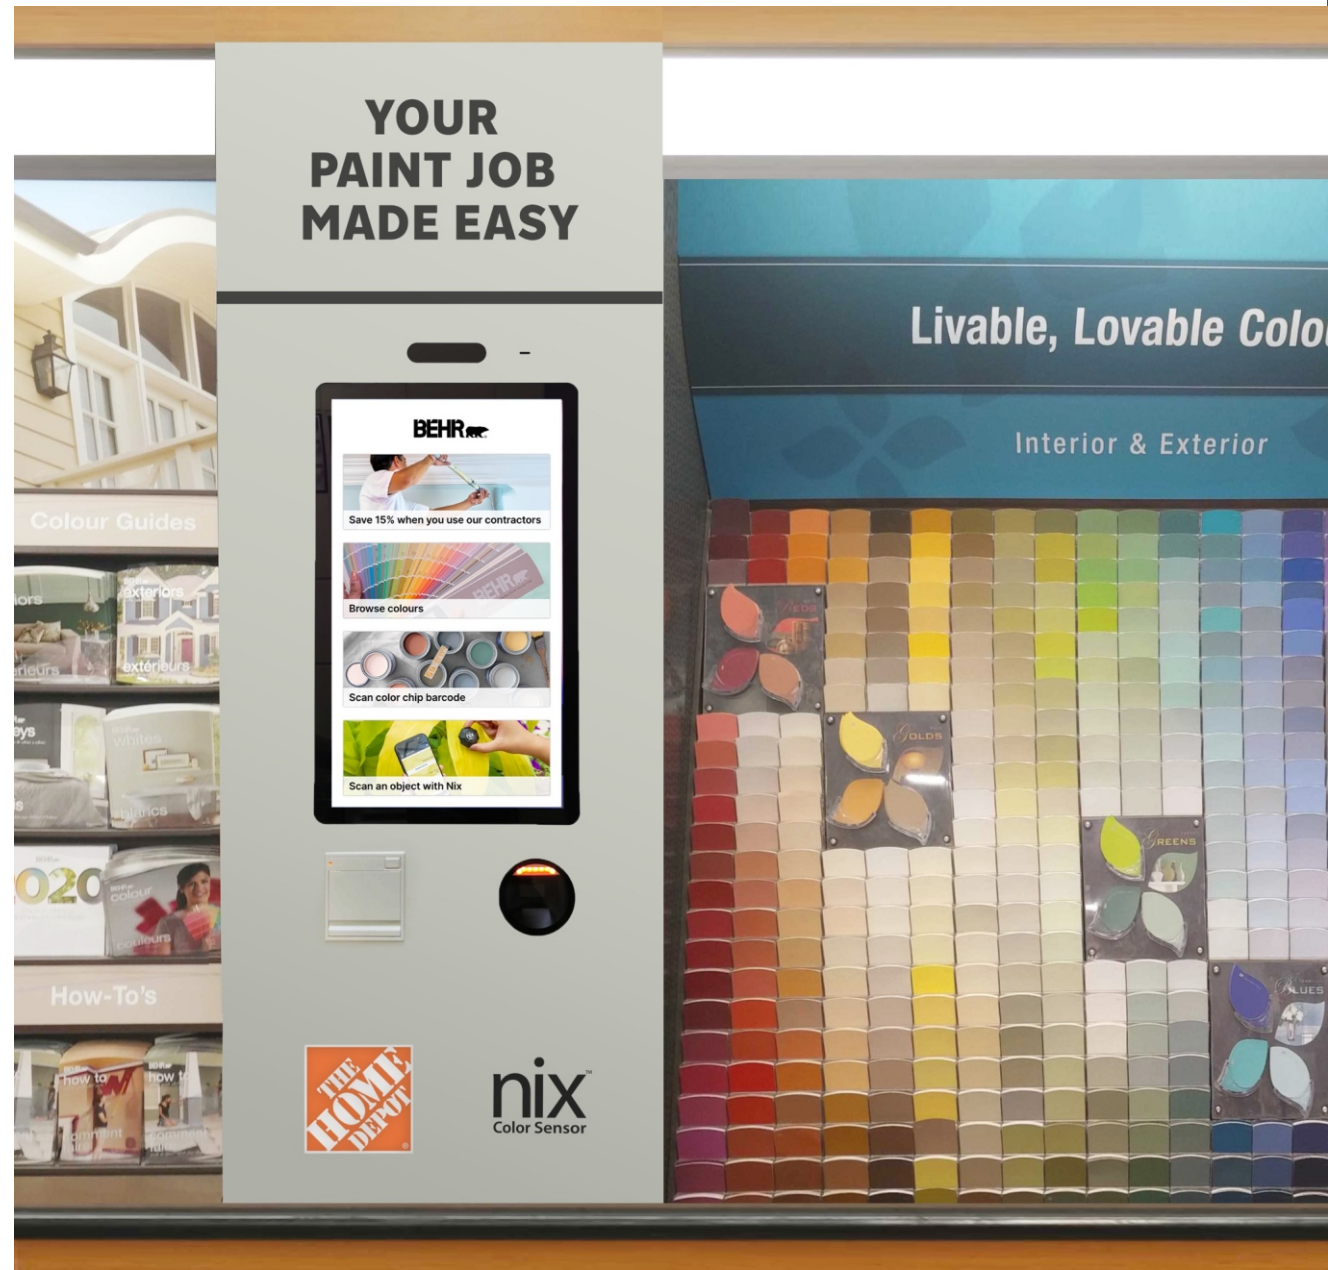

NM AUTOMATION & CONTROL PVT. LTD.

Nix success in retail: in-store displays.

Stores have integrated the Nix devices into kiosks for customers to use and interact with themselves. Customers can come in with items they'd like to scan, use their kiosks to find their match, and order paint all in one step.

NM AUTOMATION & CONTROL PVT. LTD.

Nix success in retail: in-store color consultations.

Stores with dedicated color
consultation stations use the Nix to
expand on their color toolset.

NM AUTOMATION & CONTROL PVT. LTD.

Nix partners.

Nix capabilities.

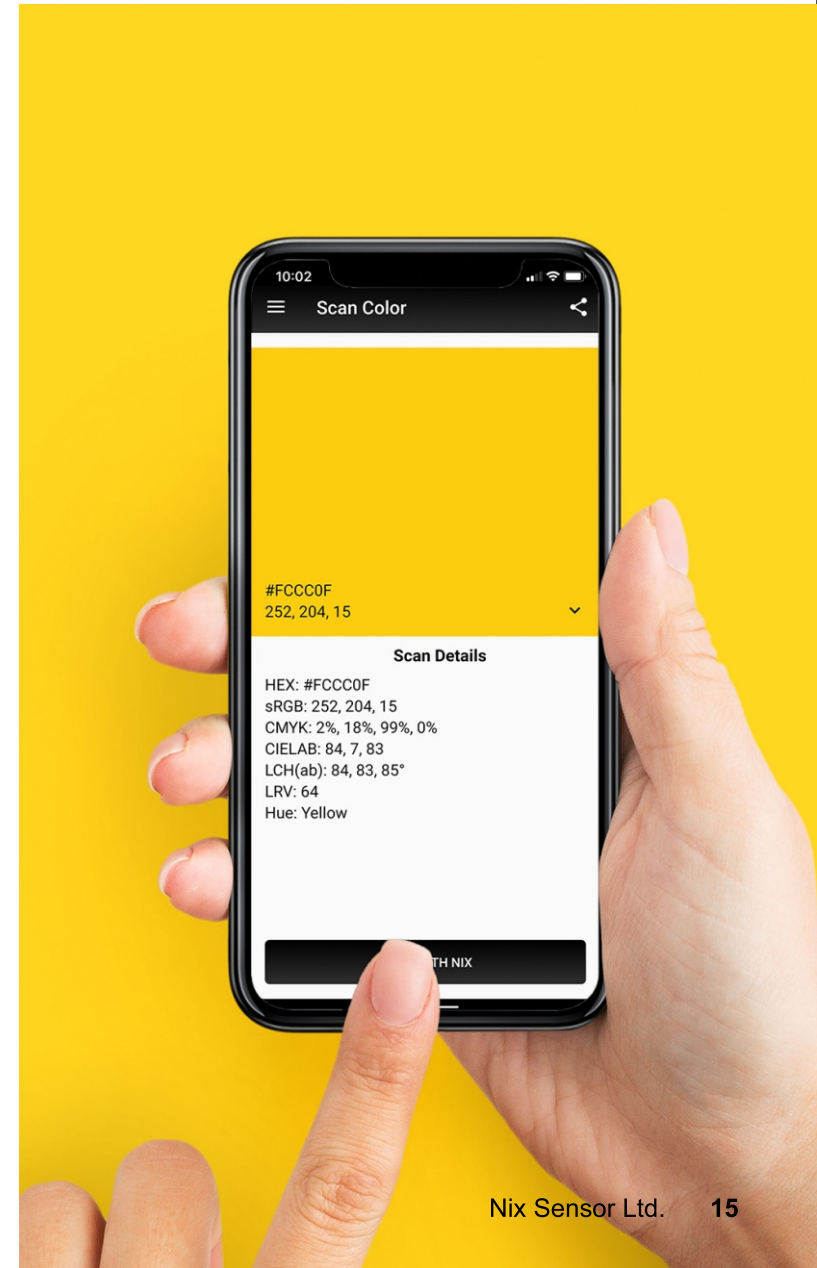

Put your brand first. Nix has delivered custom designs for brands both big and small. Want custom software to go with it? Nix delivers what you want.

Nix Digital app.

Have customers wanting to stay in the digital world? Pairing our devices with the Nix Digital app will provide digital color values in RGB, HEX, CMYK, CIELAB, and more. It's the perfect pairing for graphic designers, photographers, and anyone working in digital media. The Nix Digital app works with the Nix Mini and Nix Pro Color Sensors.
